## Legal Project Management: Efficiency in Projects

New megatrends are changing business models and, therefore, processes and procedures in companies in an extraordinary way. In light of the increased demand on internal legal departments, enhancing the efficiency of legal project work is just as important as using agile project management methods. Modern project management (PM) methods must be brought in line with the specific needs and be firmly established within the organisation. With Luther.Legal PM, we can provide a tool-based approach to combining modern project management methods with legal requirements.

Using a proven approach, we can combine legal expertise with international project management standards to obtain a methodologically sound, efficient framework within which to successfully implement projects. To this end, we integrate the three key elements – business requirements, technology and methodological competence – in a solution unit.

### Our Services:

- PM quick check: analysing the current project management structure and standards in the company (organisation, processes, communication and reporting)
- Analysing and structuring the current project portfolio
- Setting up a company-specific project management framework (organisation, processes, reporting and communication)
- Recommending or selecting potential IT support for the efficient implementation of the project (tools and platforms)
- Providing project management training
- Providing support in current, critical projects and providing project management coaching

The described service components are generally defined in more detail in moderated workshops that are attended by the

business areas involved, lawyers from Luther and our project management experts. We can provide training on-site at the company or online.

### Our Team:

Our advisory and other services depend on the entrepreneurial goals of our clients. At Luther, our lawyers and our process and digital experts cooperate closely to ensure our clients receive the best possible integrated services in all legal respects that are relevant to the matter concerned, combined with the efficient implementation of the innovative solution.
