# AGENDA & REGISTRATION

**Webinar | Monday, 28 February 2022 | 12 p.m.**

## **What could go wrong? Navigating common pitfalls when investing in Malaysia**

Investing in Malaysia is relatively easy — if you do it right. Planning ahead is crucial and requires an understanding of the necessary steps, timeframe and costs involved before a business can start operating. In this seminar, we aim to provide a roadmap for navigating the most common issues when implementing investment projects, such as:

- Company set-up: Are foreign investors subject to any restrictions in your sector?
- Licences: Which licences do you need and which one comes first?
- Foreign employees: What is required for a company to obtain work permits?
- Land: What is the process for a foreign company to purchase or lease land?

And importantly: How do we prevent things from going wrong?
